

# Memo

**To:** Board of Commissioners  
**From:** Doug Coutts, Director  
**Date:** 3/14/2019  
**Re:** Comprehensive Plan Programs-Memo

---

This month, I have continued to work on permitting for the Phase one Campground construction. I am still bouncing around between departments at the County on the Traffic Concurrency Certification/Traffic Study and what is required. I am hopeful that I am close to a final resolution. Also, I have communicated with Davido consulting on the Water System requirements and have included a copy of the email in the board packet. I am looking at scheduling a meeting of the Campground phase 1 committee in the next two weeks to delve into these further.

As part of our next steps in our Comprehensive plan-we are reviewing and revising the Master Plan for the District at a workshop meeting immediately before our board meeting. This will help point us in the right direction going forward and will partner well with our Survey and priority analysis for projects.

I have been notified that the LWCF federal Grant program was permanently reauthorized. This is good news. We still do not know a funding level for this year but I would expect that news will be coming fairly soon.
