Subject: FW: South Whidbey Parks

Doug,

Jeff reached out to DOH to see what would be required for the park to expand the water system.....their reply is below. It looks like a Small Water System Management Plan is not going to be required but rather a capacity analysis and construction doc's for the proposed expansion will be. Let us know how you would like to proceed.

Thanks,

Quin Clements, P.E.

Thanks Jeff.

We'll need a capacity analysis and construction documents detailing the system expansion. Let me know if you have any questions.

Denis,

The park has done a lot consolidation, so that the additional area is included in the Parks Zone

Technically I would say this is their existing service area.

See the attached map for additional info.

Jeff

Hey Jeff,

Is expansion of the service area part of this or no?

Denis,

SW Parks is looking to progress with adding some camping sites and would need to expand the water system to serve the comfort station and other features to support these campsites.

I am trying to get a handle on the items required by your office to support this expansion.

Let me know if you have some preliminary questions.

Thanks,

Jeff Tasoff, PE
