Re: Comprehensive Plan Programs

Comprehensive Plan

Campground Phase 1-Update

I received the letter of determination from Saratoga Environmental and will be forwarding it on to the County. It found no impact to the next from our development. Also will be writing up a conversation I have had with County health on the spigots and gravel below them for drainage and garbage cans positioned beside each spigot for scraping food waste. This should satisfy the site plan review requirements for the campground. I have also spoken with Davido about completing the Small Water System Management plan and am waiting on a quote from them.

Waterman Property Update

I have submitted a billing for the appraisal, the review appraisal and the Cultural resources survey on the Waterman Property purchase. I am working with Allison, our Grants Manager to finalize anything else with those grants.

Aquatic Facility Update

Had a good meeting with Matt and members of the Foundation to look at the Feasibility study and other items. More on that at the meeting with Matt.
