Re: Comprehensive Plan Programs

Comprehensive Plan

Campground Phase 1-Update

Received the initials draft of the Septic Design on Monday from Davido. Looking to review it and set up a meeting to go through it with their staff next week. SWSMP has been submitted to the state and has been received. We are awaiting an invoice from the State for processing the plan but the letter of receipt states that they take around 90 days to complete review. The charge would be for the review so is paid regardless of whether or not the plan is approved.

Aquatic Facility Update

The Foundation has received a letter of support from the Port of South Whidbey for the Aquatic Center project. We have reached out to Island County Commissioner Melanie Bacon to schedule a site visit. Good meeting with Representative Dave Paul indicating his support of the project.

Maxwelton Trails Park-Grant items

GPS mapped most of the trails behind the schools, a few more to do. Met with Jennifer and Matt to look at trailhead signage options. Decided the best idea would be to have the same signage as the school district signs that were recently installed by a local Rotary Club. I spoke to the people that did it and for \$200 we can have the sign installed. Temporary placement has been approved by the School District. We will be looking at a permanent access trail through the easement to connect to the Old Log Road trail that crosses into the property in an agenda item on trails at the meeting.

Amphitheater

Continued discussion with key community folks on the plans. Still working with the Rotary Club of South Whidbey on this and reaching out to the Rotary Club of Whidbey Westside for their support as well. Scheduling a Meeting involving those key folks and additionally, Eric Richmond of Flat Rock

Productions, the architect that donated his time towards this project in its initial stage, for early in August to get everyone back on the same page.
