Re: Fields Meeting

Working with the school district and the club, Skye was able to secure use of the elementary school field for the fall season to spread out the wear and tear on fields and accommodate all activities that we had requests for. There were some issues with overlap and groups staying late on fields that we worked through with the user groups involved but the season has gone relatively smoothly so far.

Staff will contact the Club at the end of October to begin discussions for Spring to ensure we are ahead of the curve and work with them on a solution so schedules for spring are spread out more throughout the week and the park is not overwhelmed from 5-6pm Monday through Thursday.
