Date: 10/13/2022
Re: Trail Projects

The trails committee met on Thursday the 13th of October and discussed 2 trail projects for the winter season. First, the already approved access trail to Maxwellton Trails Park which staff has begun work on this week. Second, an additional trail that has already been flagged in Trustland Trails to provide a final link loop trail to avoid using the ADA trail. This trail would allow the two ADA trails to be foot traffic only, giving the equestrian traffic and the bicycle traffic a full loop access that does not need to use the ADA trails as part of the loop.

Staff has flagged both trails and begun working on the access trail to Maxwellton Trails Park.
