Re: Fields Update

Skye has been working with SWYSC to spread out their usage and they initially came back with some minor adjustments. We have responded now with access requirements for them as follows:

After assessing what we'd previously required in September and viewing your proposal, the following are conditions to be met for SWYSC to have access to SWPRD soccer fields:

- Maximum of 75 players from SWYSC practicing on the fields at any given time.
- At least a 15-minute time buffer during pick-up/drop-off transition – with the schedule you proposed and including the SWHS practices (est. 30 user), there will be between 170-190 players coming & going at 5:00 on Mon-Thu.
- Expansion of days/times games are played – Saturday morning overflow spilled into areas that are not designated for parking.
- Utilize a system where coaches are being assigned/choosing their practice times/locations and then having each team's coach and practice schedule passed along to SWPRD for approval and updating field schedules – this is a norm in local youth sports leagues and the industry standard.

Information that can help accommodate these requirements:

- Sunset isn't until 7:30pm on the date of the earliest practice and will be near 8pm when U6 & U8 practice begin in April. Spread out the times that coaches can use/choose.
- Utilize Fridays (U6 & U8) & Sundays. Field use on these days is the most minimal for all users.
