Re: Video Equipment for Conference Room

Viewing the materials projected on the wall at board meetings has been challenging for the commissioners, staff, and the public to clearly see the subject matter. In many cases it's been necessary to turn off the lights in the room to see better.

Matt would like to discuss the possibility of allocating funds toward a large screen TV to be mounted on the wall in the conference room. If the board chooses to do this, it would require getting permission from Island County, deciding who will install it, and whether this would be an item we would take with us, if we vacate the building at some point.

This would exceed our current budget, and would mean approving the re-allocation of budgeted funds.
